The Speer Grafting Machine

Culleroka, Tenn., Feb. 7, 1906
Dear Sir:—Grafting Machine came all right. My man soon caught on to giving the right bevel to the grafts.
R. A. WILKES

Postoria Nursery & Fruit Farm
Milford, Iowa, Route 1, June 20, '06
Dear Sir:—Replying to your favor of the 18th, will say I did a very satisfactory job of grafting the past winter with the Speer Grafting Machine. The only trouble I experienced was in using large crooked plum roots. They were very large and very crooked, on some had to use a knife. However, the machine has been very satisfactory.

TRADE IN CANADA

Stone & Wellington Report Average Sales for Fall and Spring Better Than Ever—Sales Far Ahead of Last Year's Though Spring's Shipment of Last Year Was a Record Breaker.

Toronto, Oct. 12.—Stone & Wellington: "The sale of nursery stock this fall has been as good as last year; in fact, we find that our average sales for fall and spring better than ever.

"Last year, we sent out the largest spring shipment we have ever had, and this year, so far, we are away ahead of last year's sales.

"The demand seems good for all kinds of nursery stock."

PRESIDENT ACCEPTS RECOMMENDATION

Editor AMERICAN FRUITS:

I notice with pleasure the answers to certain questions in your recent issue by Mr. Reed, chairman of the Transportation Committee; also his recommendations. This is just what I want to see. I am ready for suggestions and recommendations from any member of the Association.

I will name a committee later and ask them to report at our next meeting on grading nursery stock of different branches, and will try to select men whom I know are good graders themselves.

ORLANDO HARRISON.

Berlin, Md.

APPLE GROWERS SOLD AT \$2

Claus Bahrenburg is back this week from up state, said the Fruitman's Guide on September 22d. He summed up the apple situation in a nutshell as follows:

"They're buying 'em up state at \$2 to \$2.50 and we are selling 'em here at \$1.50 to \$2. Great business, eh?"

According to Mr. Bahrenburg, the buyers are busy as bird dogs and judging by some purchases he cited they must be. One firm is now possessed of 40,000 barrels of various varieties, Kings, Baldwins, Greenings, etc., with hardly a barrel standing them in less than \$2; another has got hold—whether at the right or the wrong end, time alone can tell—of 25,000 barrels of Greenings at \$2; still another of 10,000 barrels, also Greenings, at \$1.75 to \$2, while one man has got his allowance of Greenings, some 10,000 barrels, at \$1.50, he to do the work on them. Nearly all these purchasers are New York concerns.

Three cars of pears in boxes were sold on the Erie dock, New York city, October 1st, at high prices. Two of them to Sgobel & Day, bringing \$2,680 and \$2,335 gross and the other to P. Ruhlman & Co. for \$2,146 gross. The two first named were Comice and winter Nellis pears in half boxes from the A. Block Fruit Co. of Santa Clara, Cal., and the third was from the Grand Junction Fruit Growers' Association of Grand Junction, Col. These were D'Anjou pears.

THE GUARANTY FUND.

Following is the list of subscriptions to the guaranty fund which was established this year as a backing of the new life of usefulness of the American Association of Nurserymen to enable it to meet expenses incident to securing advantageous results in matters of legislation and transportation, as reported by the committee of which J. W. Hill, Des Moines, is chairman:

\$5 EACH

S. C. Moon, Morrisville, Pa.; Blair & Kaufman, Kansas City, Mo.; Utah Nursery Co., Salt Lake City, Utah; W. N. Scarff, New Carlisle, O.; Wild Bros. Nursery Co., Sarcoxie, Mo.

The total value of the nursery stock imported into the United States for the year ended June 30, 1906, was \$1,600,683 as against \$1,512,566 in 1905.

Ellwanger & Barry, Rochester, N. Y., were awarded 72 first prizes for their fruit exhibit at the New York State Fair recently held in Syracuse. They also received 50 other prizes, making a total of 122 for the season of 1906.

J. F. Burdett, George I. Burdett, Robert L. Hutchinson, L. A. Amor and associates have incorporated the Point Pleasant Nursery and Fruit Co., Point Pleasant, W. Va., with \$25,000 capital stock.

Keeney Knob Orchard Co., Alderson, W. Va., has been incorporated with \$10,000 capital stock by G. S. Alderson, W. R. Harwood, A. W. Mann, J. W. Johnson of Alderson, William H. Withrow of Ronceverte, W. Va., and others.

The Middleton Fruit Co., near Gulfport, Miss., has been incorporated, with \$24,000 capital, to grow fruits and nuts. Earle W. Middleton and others.

Articles of incorporation for the Arkansas Fruit Co., of Fort Smith, were filed with the secretary of state October 1st. The capital stock is \$25,000, and the incorporators are H. W. Collier, W. B. Putnam and F. B. Lieber.

Heavy exportations of apples went forward to Australia in September and October. P. Duffy of Sydney, has engaged the cold storage facilities on the steamships of the Oceanic Steamship Co. for the entire year. He shipped twenty carloads on the steamship Sierra.

UNDER SOUTHERN SKIES

NUTS AND FRUITS IN THE SOUTH

**Great Enterprise of American Nut and Fruit Company at Ferriday, Louisiana—
Twenty-two Hundred Acres of Rich Alluvial Land in the Delta of the Mississippi
—Paying Crops of Pecans in Eight or Ten Years' Time—At Fifty Years of
Age Trees Will be in their Prime—In Full Vigor at One Hundred Years
—Building for Posterity—Pomelo Growing Near Miami, Florida.**

H. E. VAN DEMAN, Philadelphia, Pa.

In 1902 I helped organize the American Nut & Fruit Company, for the purpose of growing pecans and pomelos in the South, and whatever other fruits might seem advisable. It took two years of careful investigation before land of the proper kinds and located suitably in all respects could be found.

A tract of 150 acres of wild land near Miami, Florida, which is almost on the southern extremity of the east coast, was finally secured and improvements begun at once. Within two years we had over 100 acres of it cleared and 52 acres planted to pomelo trees of the choicest varieties and some orange and other fruit trees. In our nursery are enough to plant the rest of the area that is cleared. We have a pineapple field now in bearing and are also planting the mango, avocado and other tropical fruits, for our place is well suited to them.

RICH ALLUVIAL LAND

Less than two years ago, in March, 1905, we bought a plantation near Ferriday, Louisiana, twelve miles west of Natchez, Mississippi. It is in the central part of Louisiana, counting north and south, and in the very richest part of the whole country. The land is alluvial, being a part of the great delta of the Mississippi river. It lies almost as level as a floor, the drainage being rather difficult on this account.

The soil varies somewhat in consistency, a part being very stiff and always very sticky when wet and the rest is a mixture of clay and sandy loam. It is of great depth and exceedingly fertile. There is no richer land in all America, and the crops that it produces are constant witnesses of the fact.

HOME OF THE PECAN

It is here that the pecan is at home and has flourished for untold ages. There are gigantic trees in the forests and wherever they have the slightest opportunity to grow in the fields or anywhere that they are not crowded by other trees they develop into stately orchard forms. Their natural habit in the forests is to make tall trunks with branching tops, like most deciduous trees, but in the open light they spread their lower branches almost like apple trees. Their size is very large, in some cases being over 125 feet high, about as broad at the widest spread of branches and six feet and over in diameter of trunk. Such trees have been known to yield over ten barrels of shelled nuts in one year, although this is very unusual, three to five barrels being far more common from mature trees.

GREAT VARIETY IN NUTS

As might be supposed, there are great variations in the fruitfulness of the trees, the wild ones being seedlings, and also in

the size, shape and quality of the nuts. These natural differences have been taken advantage of by selecting such varieties as were of superior merit and propagating them. Many seedlings have been grown from these selected trees and in a few cases they have been multiplied by grafting and budding. By this process of selecting the best seedlings for many years past there has come to be several varieties of very superior merit in productiveness and size and quality of nuts.

For many years after the pecan had been brought under cultivation it was not thought that the trees could be grafted or budded, but it is now done very extensively and thousands of acres are being planted to trees of the named kinds and of the very best qualities. It is, however, much more difficult to bud and graft the pecan and other nut trees than such kinds as are usually found in nurseries and orchards. Special methods have to be used in doing the work, also much skill.

PURCHASED 2,200 ACRES

It is in the midst of this natural home of the pecan that we purchased about 2,200 acres of land, being one of the old cotton plantations, and one of the very best of them, on which to plant our pecan orchard. There were 900 acres of cleared land on the farm and last spring I planted nearly 600 acres of it to crown grafted pecan trees. These trees were all one year old from the graft, but varied from one to five feet high. Their top roots were cut back to from one to two feet long, and the laterals and fibrous roots were cut short, and all puddled thoroughly before planting. The trees were set fifty feet apart, but with the purpose of cutting out to 100 feet apart when they become too close, which will be in about twenty-five years; for they will finally need that much room.

PLANTING 600 ACRES TO PECANS ON THE 2,200 ACRE TRACT OF THE AMERICAN NUT AND FRUIT CO., FERRIDAY, LA.

[Courtesy of Rural New Yorker.]

WHEN TREES ARE IN PRIME

It is not expected that there will be paying crops on these trees until about the eighth or tenth year from planting, but from that time on there is every reason to believe that they will bear heavily nearly every year. At fifty years old they will be in their prime, at 100 years in full vigor and many of them may live to be 200 or more. There are probably no trees in America that are longer lived than the pecan, except the giant sequoias.

Between the pecan trees, in the rows one way, we are planting fig trees for the purpose of securing early returns. They usually begin to bear the second year after planting and constantly increase in yield for many years. Our plan is to preserve the figs in cans. When the pecan trees need the room occupied by the fig trees they shall have it, which will not be for about fifteen or more years.

PAYING RUNNING EXPENSES

We grow cotton as the main crop on the plantation, also corn and cow-peas in rotation with the cotton. This plan will keep the land in a proper state of fertility and will far more than pay all running expenses. At the end of fifteen or twenty years, or whenever the pecan trees need all the land, the cultivation of farm crops will be stopped.

We are just beginning the growing of vegetables, with the hope that the success will warrant considerable extension of it. The new Gould line of railway that is now being put in shape to connect St. Louis and New Orleans runs across the center of our farm and we have a flag station there, which makes transportation to market easy. We also have water transportation over half the year; for a lake on our front connects with the Mississippi river when the water is at a medium stage, allowing the largest steamboats to deliver and receive freight at our landing.

PLANTATION CALLED PECANIA

We have named our plantation Pecania, and, while this may be consistently done now we are expecting to extend the pecan orchard until it will cover at least about 2,000 acres. Land is being gradually cleared for this purpose. We have a nursery of about 200,000 pecan seedlings and all of them will in due time be budded or grafted, from which we will select the trees we need for planting. All of the field work is under my personal supervision, with competent local superintendents in charge, and we are striving to attain success by every available means.

Barring freezes, heavy and continuous rains or quick-working parasites, which in other years have contrived to cut down the citrus crop, the state of Florida will harvest in the neighborhood of 4,000,000 to 4,500,000 boxes of oranges, grapefruit, tangerines and other varieties of lesser importance this season, says the Packer.

Pickers in the Wellhouse orchard are gathering from 600 to 700 bushels of apples per day, says the Tonganoxie, Kan. Mirror, under date of September 27th. The Jonathans were finished several days ago, and the York Imperials are now going into the barrels. The pickers will be transferred to the orchard of the Missouri Valley Orchard Co. in a few days. The culls from the Wellhouse orchard are being shipped to Leavenworth. They are bringing 16 cents per 100 pounds in the cars at Summit.

It is proposed to erect a tablet in honor of the original Northern Spy apple tree, which is still standing in Ontario county, N. Y.

JUNE-BUDDED PEACH

Have Made Wonderful Growth in Tennessee—Large Per Cent. Will Measure Three to Four Feet, Stocky and Well Branched—Some Six Feet will Caliper Three-Quarters Inch—One-Half as Many June-Budded at Winchester as Usual.

Winchester, Tenn., Oct. 15.—Southern Nursery Co.: "Southern nurserymen's largest sales are made during the spring and summer months for fall delivery. Sales have been unusually good. Deliveries have just commenced. It is too early to say how collections are going to be.

"The indications are encouraging. Crops are generally good, with the exceptions of a few localities. Rain in some sections has injured cotton from 25 to 40 per cent. However, this is not general.

There is a good demand for peach, especially Elberta, Carman and other commercial varieties. About one-half as many June-budded peach at Winchester this year as are usually grown. June buds have made a wonderful growth; good per cent. will measure 3 to 4 feet; stocky and well branched. We have seen specimens

PROF. H. E. VAN DEMAN IN HIS FLORIDA PINEAPPLE FIELD.

(Courtesy of Green's Fruit Grower.)

of June buds this season 6 feet that would caliper $\frac{3}{4}$ inch.

In our opinion the June-budded peach will take the place of the one-year peach to a great extent in a few more years; they are generally preferred by the large planter."

The Western Reserve Nurseries, Perry, O., were established in 1861 and were incorporated in 1892. The proprietors, L. Green & Son Co., comprise Fred D. Green, president and general superintendent; H. J. Manchester, vice-president and assistant general superintendent; F. G. Salkeld, secretary and treasurer; W. W. Joiner, assistant superintendent.

C. C. Clemons sums up the Missouri apple situation thus: "In August the Missouri apple crop was estimated at 60 per cent of a full yield, or 300 per cent. of last year's crop. Codling moth, supplies used by evaporators and for cider, bitter rot, lack of storage space and the high price of barrels have combined to cut down the crop of fruit suitable for storage so that at the present time the crop from a commercial standpoint will be only double that of last year or 25 per cent. of a full crop."

PERSIMMONS, POMEGRANATES

Muscadine Grape, Figs, Pecans and Mulberries Causing Increased Demand From Nurserymen for Southern Planting—Griffing Brothers Company Reports Larger Fall Business Than for Several Years—Outlook Good.

Jacksonville, Fla., Oct. 12.—W. D. Griffing of The Griffing Bros. Co.: "Fall business with us is better than for several years. We are selling to the nursery trade large quantities of budded and grafted pecans, Japan persimmons, figs, pomegranates, Muscadine grapes, mulberries, etc. These are fruits that are especially adapted to the south, and the demand for them seems to increase yearly.

"We do not have any divided fall and spring trade; our winters being open, we are shipping constantly from about October 1st until well into April.

"Our retail catalogue business is increasing which is evidence that a great many people in the south prefer to buy direct from the nursery. Altogether the outlook for business in this section is good."

DOUBLED LAST FALL'S SALES

Baltimore, Md., Oct. 12.—Franklin Davis Nursery Co.: "We are having the heaviest fall packing we have had for years. Our sales up to this time are double what they were last fall and orders are still coming in. Stock is getting scarce in some lines. The season is all that we could ask for; the ground in splendid condition for digging and the weather fine."

More than four hundred acres of nurseries are cultivated by the Griffing Brothers Co., proprietors of the Pomona Nurseries, whose general offices are in Jacksonville, Fla. Branch nurseries and offices are conducted at Macclenny, Kokomo, Griffing and Miami, Fla. Orange, peach and budded pecan trees are a specialty.

One noticeable feature of the apple business in the southwest this season has been the large number of outsiders who are taking a hand in the game, says the New York Packer. As a usual thing the buyers from the southern and western points are old commission men of experience. This year growers are finding the buyers to be men from all lines of business who have been hearing of the large supply and low prices of apples in this section.

IN CENTRAL STATES

SHORTAGE FOR SPRING

Indicated in Reports From Nursery Centers of the Middle States—Material Increase in Prices of Pear, Cherry and Apple Trees Is Anticipated with Peach Holding their Own—Outlook Good.

Bridgeport, Ind., Oct. 12.—Albertson & Hobbs: "It is very hard at this time to make up much of a report on sales of nursery stock as we are just now getting a good start in the packing; but sales promise to clean up the stock closer than usual and that there will be less surplus left for spring of almost all lines of stock excepting plums.

"In fact, it now looks like there would be a great shortage of almost everything else for spring packing and that there would be no falling off in prices, but a very material increase. This seems to be especially true of pears, cherries and probably apples, with peach holding their own.

"Demand for ornamental stock has also been heavier than usual and will certainly be cleaned up pretty closely. We thing the outlook for spring trade was never better than it is now."

SOLD OUT OF CHERRY

Vincennes, Ind., Oct. 11.—H. M. Simpson & Sons: "It is really too early to give much idea of what the fall trade will amount to; but judging from what we have already on our books it will be equal if not ahead of any season in our history. We are practically sold out of two-year cherry and our one-year cherry are going very fast. Cherry is our principal line, so when they sell well we are assured of a good trade. There seems to be no surplus of any kind to speak of at this point and it looks like everything will be cleaned up this season.

"Both our one-year and two-year cherry made a most excellent growth and our trees were never finer. The leaves are still sticking tight even now."

FALL SALES AT TROY, O.

Troy, O., Oct. 12.—The George Peters Nursery Co.: "Our fall sales are very good and we will have less stock to offer for spring than we have had for many years at this season of the year."

PROBABLE SCARCITY FOR SPRING

Painesville, O., Oct. 12.—The Storrs & Harrison Co.: "We think, while we have had no time to do any figuring, that we have considerable more stock sold than we ever had, at this time of the year. Of course, a good proportion of this is for late fall and spring delivery. Are already sold close on a good many of the leading articles, and if the winter is so that sales are as heavy as usual, it seems to us that in a great many lines of stock there will not be enough to go round next spring."

OBITUARY

Albert Wyckoff, vice-president of the Albaugh Nursery Co., died on September 25th, aged 60 years.

Ransford S. Johnston, nurseryman, Stockley, Del., died recently, aged 70 years. In 1865 he bought land and planted peach orchards. In the spring of 1868 he started a nursery of fruit trees at Stockley, Del., which has been his home ever since, remaining continuously in the nursery business. He was proprietor of the Sussex Nursery, embracing 300 acres.

COMMITTEE ON TARIFF

E. Runyan, Elizabeth, N. J., a member of the committee on tariff, of the American Association of Nurserymen, makes this announcement:

As I am one of the members on the committee on tariff, I would like all nurserymen who are interested in the tariff, express or freight rates, east of Syracuse and the New England States, including New Jersey, to write me; and those of Western New York and Pennsylvania to write W. H. Moon of Morrisville, Pa. We hope to call a meeting in New York about December 1, and would like the views of all the nurserymen before that time, so that we may get our reports ready.

TEXAS INDUSTRIAL ASSOCIATION

Dallas, Tex., Oct. 17.—A new set of officers has been elected by the Industrial Association of Texas. T. L. Peeler, industrial agent of the Missouri, Kansas & Texas Railway System, was elected chairman to succeed Stanley H. Watson, industrial agent of the Houston & Texas Central. H. E. Hershey, industrial agent of the Gulf, Colorado & Santa, was elected secretary, succeeding F. B. McKay, general freight and passenger agent of the Texas Midland, and F. B. Brooks, general agent of the San Antonio & Arkansas Pass, was made vice-chairman, succeeding T. S. Peeler. The three officers named constitute the executive committee.

The objects of the association are to harmonize the work of the various railways along industrial lines and divide certain duties among the members.

J. Van Lindley Nursery Co. has erected a storing house, 100x200 feet, greatly adding to its stock-handling facilities.

The fifth annual convention of the National Nut Growers' Association is scheduled for Scranton, Miss., October 31-November 2. E. W. Kirkpatrick, McKinney, Tex., is president; J. F. Wilson, Poulan, Ga., secretary-treasurer.

The Rural New Yorker, January 20, 1906, reporting the New Jersey State Horticultural meeting, says: "A comparative trial made by the Pennsylvania Railroad Co. in spraying fourteen miles of Osage orange hedge, showed the soluble oils to be better than lime and sulphur, where the charges for labor and fuel, as well as first cost of materials, were reckoned up."

Ohio Department of Agriculture says: "Refined petroleum or kerosene has been used successfully on apple trees." They also say: "Crude petroleum will kill scale," but as there is danger in using undiluted oils, it is safer and wiser to use kerosene or crude oil in connection with soft naphtha soap and Takanap is the only soap you can easily mix with kerosene or crude oil.

The H. J. Weber & Sons Nursery Co., Nursery, Mo., has a capital of \$50,000. It was established in 1867 and was incorporated in 1903. The officers are: President, H. J. Weber; vice-president and general superintendent, Wm. A. Weber; secretary and treasurer, Frank A. Weber; superintendent floral department, Walter T. Weber; assistant superintendent, George A. Weber.

ONLY ONE THAT SHOWS PROFIT

AMERICAN FRUITS is the only strictly Nursery Trade Journal whose yearly balance sheet shows a profit.

Yet its circulation is the largest and its advertising rates are the lowest.

In less than three years' time it has outstripped all competitors.

UNABLE TO MEET ORDERS

Busiest Fall Ever Experienced by L. Green & Son Company—Demand Far Exceeds the Supply in Some Lines—Ohio Nurserymen Report Apple, Pear and Cherry About Exhausted—Plum Trade is Sluggish.

Perry, O., Oct. 11.—F. D. Green, president L. Green & Son Co.: "This has been the busiest fall so far that we have ever experienced. Have been unable to keep up with our orders and the demand seems to be extra good on nearly every thing and far exceeds the supply in some lines. Think prospect for spring is as good."

FALL BUSINESS STRENUOUS

Xenia, O., Oct. 10.—McNary & Gaines: "Fall business so far has been strenuous with a steady demand for all kinds of stock. Apple, pear, cherry about exhausted, with good demand for peach for later shipment. There is just one little fly in the ointment this fall and it proves to be a 'curculio.' The plum trade is a little sluggish."

SMALL FRUIT PLANTS TRADE

New Carlisle, O., Oct. 11.—W. N. Scarff: "We find our trade running favorable with last fall's business and feel quite sure there will be no surplus in small fruit plants this season."

An addition has been built to the packing sheds of Hoopes, Bro. & Thomas at their nurseries, West Chester, Pa.

The Fonthill, Ontario, nurseries of Stone & Wellington are the largest in Canada. They comprise more than 800 acres.

H. M. Simpson & Sons, Vincennes, Ind., have a commercial orchard at Parkersburg, Ill. Cherry trees are a specialty at the Knox Nurseries.

The New Haven Nurseries, New Haven, Mo., have 100,000 cubic feet of frost-proof coal storage. The concern was established in 1872 and was incorporated in 1892.

Moore & Hicks, proprietors of the Smithville, Tenn., Nurseries, have purchased another farm and will make preparations at once to put part of it in nursery stock.

Much damage was caused in Western New York by wind and snow in apple orchards last month, many apple trees being broken down by the weight of snow added to the weight of the fruit.

The L. Green & Son Co., Perry, O., have 800 acres, grow high grade nursery stock of all kinds and make a specialty of standard and dwarf pear, cherry, plum, peach, roses and ornamentals.

The Storrs & Harrison Co., Painesville, O., has a capital stock of \$150,000, all paid in; it was established in 1854 and was incorporated in 1881. J. J. Harrison is president; Robert George, vice-president and general manager; J. H. Dayton, secretary, and W. C. Harrison, treasurer.

LEADING NURSERYMAN'S JOURNAL

R. C. Berckmans, Augusta, Ga.—"In my opinion AMERICAN FRUITS is the leading journal in America for fruit growers and nurserymen. It fills the demand which has long existed for a high grade publication adequately to represent the great horticultural interests of the country."

FROM WESTERN POINTS

HEAVY APPLE DEMAND

Demand for Late Shipment for Spring Use Has Been Especially Good in Kansas—Fall Planting Comparatively Light—Conditions Indicate a Clean-Up in Everything Before Spring.

Topeka, Kan., Oct. 13.—L. R. Taylor & Sons: "Fall planting in this section is comparatively light, so the volume of our business for early fall is not large; it is however, fully up to the average.

"The demand for late shipment, for spring use, has been exceedingly good, especially in apple. Not much doing in peach as yet, but it is somewhat early for these, as bulk of peach are planted in the spring and the probable amount of these trees needed will not be known until later on. Supply of cherry, plum, pear, apple seedlings, etc., here is unusually small and we think present conditions indicate a clean up in everything before spring."

RETAIL ORDERS DOUBLED

Beatrice, Neb., Oct. 13.—Carl Sondergerger: "So far, we have had a very good trade this fall. We think we have almost doubled the retail orders. As you know, we only do a catalogue business; have no agents out. The outlook for spring, according to the inquiries for three we are receiving, seems to be first rate. We are getting out more catalogues than ever."

OUTLOOK FAVORABLE IN KANSAS

Ottawa, Kan., Oct. 12.—A. Willis: "We have had here the past summer a pretty favorable season; farm crops are generally good. We have had a fair trade, about the same as last year. Wholesale trade seems to be about the same as last year. Most of our stock has grown to a larger size than usual. The season has been favorable in the matter of rain, giving us opportunity for cultivating to secure a good strong growth of stock. This fall is very dry. We read of heavy rains in various places; but it is about as dry here as I have ever seen it.

"We are now making preparations for our fall packing and hope to begin the 22d of this month. Help is pretty scarce, laborers have been more than usually well employed during the season and there seems to be an especial amount of labor in every line to be done in order to make preparations for winter. We have, so far as we can judge at this time, as large a stock as we have ever had, with the prospects for trade for both later shipments for fall and spring excellent. I have made some inquiry among other nurserymen, and all seem to feel encouraged by the favorable outlook for the year to come.

"So far as being busy is concerned, we have never been more busy than we are now. The past season we have added largely to our packing and storage facilities and done some other building which in addition to our regular business has made us more than busy."

AFFECTED BY LABOR CONDITIONS

New Haven, Mo., Oct. 10.—R. J. Bagby, treasurer New Haven Nurseries: "We have not pushed our sales for fall delivery owing to the fact that just at this season of the year it is very difficult to get much

additional help; hence, we have felt it in our interest somewhat to neglect our fall business, feeling that the demand is good enough to take all the stock later in the season when same can be handled better."

HEAVY BUSINESS BY WEBER & SON

Nursery, Mo., Oct. 16.—H. J. Weber & Sons Nursery Co.: "The outlook for business this fall is very flattering with us and if the weather will only hold out we believe we will do the largest fall business we have done in many years.

"We are already receiving quite a number of orders for spring business and the outlook at this time is far better than it was a year ago."

STORED 10,000 BARRELS

A dispatch to the New York Packer from Louisiana, Mo., says under date of October 12th:

The Stark Nursery and Orchard Co. has stored 10,000 barrels of apples in cold storage warehouses at Chattanooga and Nashville, Tenn., and Mountain Grove and Hannibal, Mo. Seventy-five per cent. of them are Ben Davis and the balance Grimes, Mammoth Black Twigs and Missouri Pippins. The crop share department of this big concern is under the management of R. H. Williams.

This firm annually puts out thousands of acres in orchards all over the country on a crop share plan, the company taking two of the crops of fruit within ten or fifteen years as payment for the nursery stock. This gives a wide acquaintance in the producing sections and places Mr. Williams in a position to be in touch with conditions everywhere. His correspondence shows that it is safe to estimate that not one-half of the apples will go into packages. The country cold storage plants in the west will be full within ten days and growers are putting stock in cellars, barns and other places in bulk. Most of this fruit is of an inferior quality and will never reach the markets.

CODLING MOTH AND BITTER ROT

T. C. Wilson, Hannibal, Mo., secretary of the American Apple Growers' Congress, says:

The whole section north of the river in Missouri has been damaged by the codling moth. Many packers and growers report that much of the fruit that looks excellent on the trees, when spread on the tables preparatory to packing is found to be extremely worm eaten and from the southern portion of Missouri, Illinois and other states the reports on the bitter rot are distressing. Of course there are plenty of apples to go round and I am not crying short crop but I do say that the amount of good fruit on the market will be considerably shorter than the quantity that has been estimated. Packages and labor have been very scarce but the growers and packers are certainly grading their fruit properly this year.

RECENT PUBLICATIONS

Missouri Horticultural Society—Proceedings for 1905, issued by the secretary, L. A. Goodman, Kansas City. Reports of the meetings at Versailles, June 13-15, and at Kansas City, December 28-30, 1905. Cloth, pp. 451, illustrated. A valuable compendium of horticultural information.

The report of the proceedings of the Dallas meeting of the American Association of Nurserymen has been issued by the secretary, George C. Seager. Delay in the publication was caused by the official stenographer.

American Fruits \$1 Per Year

LIVELY IN THE WEST

Heavy Demand for all Kinds of Stock Has Kept Nurserymen Hustling—Sold Out on Many Varieties and Prospect of Shortage in the Spring—Williams & Bernardin Prophecy Large Attendance at Detroit Next June.

Parsons, Kan., Oct. 16.—Williams & Bernardin: "The general outlook for the nursery business in this part of the country was never better and sales for fall have been very good—much better, in fact, than for several seasons and the spring trade should be even better. The large fruit crop throughout this whole southwestern country in every variety, with good prices prevailing, has made a large demand in all kinds of stock, including small fruits of all kinds.

"We are already sold out in many varieties and grades and spring will find much shortage in stock throughout the west, especially in peach and cherry all grades and in apple three-fourth and up; and prices on these articles will surely advance.

"The growing season was a little too wet for good cultivation, but stock has done well and made a late growth. The last four weeks have been dry and it was needed to ripen up stock for fall use. Stock will go into the winter in first-class condition.

"Our greatest trouble at this time is the shortage of help and this seems to be a general complaint in all lines of business. The railroads also seem to have more than they can do; for on what little shipping we have done at this date, the service has been poor and we see no better insight with the vast crop of everything to move.

"With general prosperity in this western country, the western nurserymen should be well represented at the annual meeting in Detroit next June."

HOW IT IS DONE

The very latest—seedless watermelons—were recently displayed in a Santa Fe car from the Pecos Valley, N. M., at the Union Depot in Kansas City, Mo., says the Kansas City Star. The car is filled with an exhibit of grain, fruit, vegetables and ore selected from different points in the valley. It has two eighty pound watermelons, a Missouri pippin apple that weighs twenty-four ounces, a bunch of grapes that weighs eleven pounds, a cucumber that weighs five and a half pounds and other fruits and vegetables of unusual size.

"Seedless watermelons require considerable cultivation," said W. C. Breeding of Lakewood, N. M., one of the men in charge of the car. "After the vine has grown three or four feet in length the end is covered with earth. When this end takes root it is cut loose from the old roots and the early blooms are pulled. Melons grown from the second blooms are seedless."

The Atlantic Fruit Co. has declared an initial dividend of 15 per cent. out of the earnings of the company up to September 29th.

AMERICAN FRUITS

An international monthly Nursery Trade Journal, circulating throughout the United States and Canada and in foreign countries, covering every branch of the industry. A Business Journal for Business Men.

Nova Scotia Fruit Growers Association—President, Ralph S. Eaton, Kentville, N. S.; secretary, S. C. Parker, Berwick, N. S.

Ontario Co-Operative Fruit Growers' Association—President, A. E. Sherrington, Walkerton; secretary-treasurer, A. B. Cutting, Toronto.

THE SEASON'S TRADE

Special reports to AMERICAN FRUITS from the nurseries of the country, as published in this issue, give the first summary of the fall nursery business. Our correspondents agree that there promises to be a general clean-up of nursery stock, especially fruit stock, with the exception of plum. Prices are stiffening and the prospect is that by spring there will be a shortage on most kinds of fruit stock. The demand for fruit trees has been unusually lively.

Trade has been good generally. Many nurserymen report large increase in business; in some cases the increase amounts to double the trade of last year at this time. In several instances the demand has exceeded the supply and it has been difficult to keep up with the orders. All nurserymen are busy and there is every reason to believe that the prosperous conditions will continue. In most cases there has been a fine growth of stock and the preparations for delivery have been attended by favorable weather.

FOR THE NATIONAL FLOWER

Through the special efforts of James Handly, Quincy, Ill., H. W. Collingwood, New York City, and others, October 16th has received considerable recognition throughout the country as National Apple Day.

AMERICAN FRUITS was among the very first to take up the suggestion and to promulgate the proposition. And now a number of state, district and national organizations of horticulturists have indorsed the movement. The idea is to induce as many persons as possible to eat one or more apples on October 16th.

And now it is proposed to make the apple blossom the national flower. James Handly says: "E. J. Parker of Quincy, who has been president of the National Park and Outdoor Association and for the past score of years President of the Quincy Park and Boulevard Association, is an earnest champion of the cause. Besides an attractive beauty, the blossom represents a mammoth industry and stands for a vast amount of business finding its way through the varied ramifications of trade and commerce."

The idea is worthy of consideration.

SEEKING FOREIGN MARKETS

Never before has there been so great a tendency to seek foreign markets for American fruit. Shipments of apples to Great Britain are increasing annually and this year excellent prices have been obtained, as is shown by our news columns.

And now for the first time Siberia has been invaded. The first shipment was made on October 12th from Seattle, Wash., on the steamship Dakota. D. Yoddgoglou, a prominent fruit merchant of Vladivostok, has arranged to send a trial shipment of Pacific Coast fruit to his native town.

"Heretofore," said Mr. Yoddgoglou, "we have been obtaining our fruit from Japan and China, and it has proven very unsatisfactory. The fruit has been sour and small.

"I have been through the Pacific Northwest buying watermelons, pears, grapes and apples, which I will ship by cold storage. Much of the fruit has been purchased green in order that it will keep well.

"It will take twenty-eight days altogether to get the fruit to Vladivostok. The cargo must be transhipped from Japan. We have never had any watermelons in Siberia before. My entire cargo consists of 600 boxes of apples, 38 to the box; 75 barrels of grapes, 200 watermelons and 60 boxes of peaches.

"On account of the price none but the rich of Siberia can afford to eat fruit. We have had so much trouble with the Oriental fruits that I am trying as an experiment this cargo from the United States."

These shipments are indications of the broadening demand for trees to form the commercial orchards where the fruit demanded abroad is to be raised. The nurseryman is directly interested.

NOT THE OFFICIAL JOURNAL, BUT—

When AMERICAN FRUITS was established there was real need for a nursery trade journal with circulation adequate to the importance of the industry and the number of people engaged therein. Indeed there was special need because of the splendid work of the American Association then under way and since accomplished, in the way of securing new and more favorable freight classification. The support of every active nurseryman was needed and in order to secure this support it was important that full information be widely published. AMERICAN FRUITS devoted column after column to this and all other nursery trade matters, publishing the first official notice of the new freight classification and sending the good news broadcast throughout the land.

Again AMERICAN FRUITS did not restrict its report of the Dallas convention to brief reference to the addresses of welcome and a few of the entertainment features, ignoring the succeeding sessions; but gave to its readers a concise running account, not only of each session, but of all convention happenings, mailing ten days earlier than any other trade journal and nearly twice as many copies.

THE ANNUAL CONFERENCES

The season for holding annual meetings of state and district horticultural societies is nearly at hand. We have often urged the importance of attendance at these meetings by the nurserymen. It is here that the buyer and the grower of nursery stock may get together and exchange ideas. The nurseryman is sure to obtain valuable information as to approximate demand for certain varieties. That the nurserymen are welcomed at the fruit growers' meetings is shown by the fact that in many cases the nurserymen are chosen for high offices in the horticultural societies.

The Northwestern Horticulturist in its last issue said: "Local nurserymen and commercial fruit growers are becoming more fully convinced each year of the helpfulness to both derived from more frequent consultation. Specializing is the order of the day, but nurserymen cannot afford to take the risk of devoting attention to specialties unless there is some certainty their stock will be in demand. The general trade of the nurserymen requires a large list of varieties in each class of the different fruits grown. It would be more economical for nurseries and better for the growers to have the list considerably shortened. The fairs and horticultural conventions are helps in the get-together movement."

NURSERY INCREASE

P. J. Berkman's Company Adds 240 Acres To Extend Planting—Demand for Commercial Varieties of Peach Falls Off—Increased Demand for Ornamental Stock—Scarcity of Competent Labor.

Augusta, Ga., Oct. 12.—P. J. Berkman's Co.: "Fall delivery of nursery stock has already commenced owing to the unprecedented cold weather. The first white frost was October 7th. On October 11th, the mercury registered 34 degrees and a little ice was formed.

"The demand for a general line of nursery stock is good, but that for the commercial varieties of peaches in large lots for planting in the south is not as heavy at this time as last year; this is owing to the low prices which prevailed generally throughout the south for peaches for the last two years; also to the exorbitant freight and refrigeration rates demanded by the transportation companies.

"In every section of the south there is shortage of competent labor.

"We have increased our nursery acreage this year by a lease of 240 acres. A large portion of this acreage will be planted in peaches, plums, Amoor privet and ornamental shade trees.

"A new gasoline pumping plant has been recently installed, which gives us more than double the former large supply of water.

"Later several acres will be covered by the Skinner irrigation system. The demand for ornamental trees and shrubs is largely on the increase."

GOOD BUSINESS IN KENTUCKY

Warsaw, Ky., Oct. 15.—The Donaldson Co.: "We have been as busy as we could be since the middle of September. Our sales are better than last year up to this time, and the way orders keep coming and inquiries for stock, we believe that there will not be much surplus for spring. In ornamentals and some lines of shrubs we are pretty well sold out. Our sales on seedlings for commercial forest planting have been double those of last fall.

"Fruit trees are moving rather slower; in fact, plums and apples do not seem to be in demand; pears and cherries about cleaned up. We expect by the end of the fall season that our sales will be from 20 to 30 per cent. greater than last fall."

AFFECTED BY FRUIT MARKET

Chattanooga, Tenn., Oct. 13.—Chattanooga Nurseries: "Our fall sales have not been up to the usual average. We attribute this to the unsatisfactory markets for the fruit crops this past season. We make a specialty of selling the commercial planter. Too early to be able to tell what the spring will bring us."

ALL BUSY AT HUNTSVILLE

Huntsville, Ala., Oct. 15.—Henry B. Chase, president Chase Nursery Co.: "All the Huntsville nurserymen are very busy at this time, and we think the wind-up of the fall business will show a very satisfactory volume of trade handled. All indications point to a fine winter and spring business."

The apple exports in the first week of October from all American ports were 92,453 packages; last year the same week, 161,191 packages. New York shipped 18,277 packages; Boston, 18,194; Montreal, 38,900; Portland, 2,141; Halifax, 14,941. Liverpool gets 46,228 packages; London, 19,367; Glasgow, 19,676; Hamburg, 3,948; Bristol, 528; Bremen, 324; Cardiff, 336, and Manchester, 2,046. York Imperials brought \$2.75 to \$3.75. Kings, \$3.75 to \$4.50. Canadian apples \$3.25 to \$4.50. New England apples \$2.50 to \$3.75.

MAHALEBS A SPECIALTY

Remarkable Success of Cooper & Moncrief in Supplying Demand for a Particular Stock—More than Two Million Sold—Visit to the Cherry Districts of Tennessee and Alabama Shows Greatest Satisfaction with Results.

The practicability of specializing has again been demonstrated. Cooper & Moncrief, Winfield, Kan., have been making a specialty of Mahaleb cherry stocks. They have sold two million and during a visit last month to the cherry districts of Tennessee and Alabama they found that their stocks planted last year are giving the highest satisfaction.

W. F. Heikes, Huntsville, Ala., thinks that these stocks are equal to the imported French stocks. The Southern Nursery Co., Winchester, Tenn., planted 150,000 of these stocks last year; they say that they are fresher, better matured and much more satisfactory than the imported stocks. W. C. Reed and H. M. Simpson, Vincennes, Ind., are so well pleased that they ordered 400,000 this year and 100,000 a year in advance. F. W. Meneray of Crescent Nursery Co., Council Bluffs, Ia., says that it is plainly seen where these stocks were budded in his two-year-old cherry blocks.

It is a matter of general interest to know that such stocks can be grown in this country and that nurserymen are not entirely dependent upon imported stocks.

CLEAN-UP AT VINCENNES

Vincennes, Ind., Oct. 17.—W. C. Reed: "From the present indications this will be the heaviest fall's business we have ever done. In fact we have about as much sold at this time as we sold in the fall of 1902, which was our heaviest packing season, and orders are still coming in very fast. Most lines of stock will be cleaned up very close.

"There seems to be a surplus of plums, but pear and cherry are nearly all sold, with the exception of one-year.

"Apple seem to be moving better than we anticipated and think there will be very little to carry over; in fact, we hardly know where the stock is to come from for spring packing.

"There seems to be quite a shortage of labor and it is hard to keep up as well with our shipment as we would like to."

232,000 TONS OF GRAPES

Prof. U. P. Hedrick, horticulturist, and N. O. Booth, assistant horticulturist, at the New York State Experiment Station at Geneva, have been in Rochester and Monroe county making a survey of the grape district to be used in determining the acreage devoted to the grape industry in the entire state, an informal survey of which is being completed.

Statistics that have already been obtained show that there are 58,000 acres devoted to the grape business and that the total state crop for this year will be approximately 232,000 tons. The section, in which grapes are most successfully grown, the horticulturists find, is where the hills slope toward Lakes Erie and Ontario.

Prevalence of black rot was found in the vineyards in all parts of the state, but the damage done by it was made up to some extent by good prices and an abundant crop in most sections.

Heavy shipments of apples have been made this fall from Saltillo, Mexico.

ALONG PACIFIC COAST

NURSERYMEN AND INSPECTORS TO MEET

Joint Convention at Hanford, California, Early Next Month—Pacific Coast Association Plans—Fruit Growers to Attend—Needs and Possibilities of Nursery Business in California—Need of Uniform Inspection Laws—J. B. Pilkington on European Methods.

Following is the provisional programme for the special meeting of the Pacific Coast Association of Nurserymen at Hanford, Cal., December 4-7th, in conjunction with the fruit inspectors of California:

Address of Response on behalf of Pacific Coast Association of Nurserymen—Hon. E. L. Smith, Hood River, Ore.

"Inspection Laws of California."—George C. Roeding, Fresno, Cal.

"Relation of Fruit Growers, Inspectors and Nurserymen."—John Isaac, secretary Commission of Horticulture.

"Fruit Varieties."—Prof. E. J. Wickson, University, Berkeley, Cal.

"What Fruit Growers and Inspectors Expect from Nurserymen."—H. P. Stapler, secretary County Horticultural Commissioners.

"Nursery Business in California, Its Present Needs and Future Possibilities."—Leonard Coates, Morgan Hill, Cal.

"Plant Introduction Gardens."—H. P. Dorsett, Chico, Cal.

"Benefits to be Derived From the Pacific Coast Association of Nurserymen."—S. A. Miller, Milton, Ore.

"Need of Uniform Inspection Laws."—A. Eckert, Detroit, Wash.

"European Methods."—J. B. Pilkington, Portland, Ore.

Subjects to be selected, by M. McDonald, A. Brownell and others.

The grape crop in the territory surrounding Pasadena, Cal., is the best known in several years, and the demand for the fruit is so great that the vineyardists will realize a handsome return from their property.

W. A. Phelps of the Fruit Growers' Association says that there has been \$8,000 worth of fruit shipped out of Longmont, Col., this season.

Six carloads of oranges and six carloads of lemons were shipped from southern California October 3d. The total shipment of citrus fruit to that date was 25,607 carloads.

The life of an orange tree is uncertain, depending largely upon the soil about it and the care it receives. There are instances in Europe where they are bearing at 500 years of age. Next to the olive, it is probably the longest lived fruit tree.

The Hawaiian Islands are going into the fruit industry in earnest, and are making arrangements for San Francisco to handle the products of the rich orchards and vineyards in the islands. J. E. Higgins, a horticulturist of Honolulu, in charge of the Hawaiian Agricultural Experiment Station, is in San Francisco, investigating growing and market conditions.

The average return for a carload of deciduous fruit shipped east of the Rockies from California is conceded by shippers to be \$1,200. Railroad and refrigerator charges average about \$450 a car. This leaves for the grower and shipper about \$800 a car, or a little less, net proceeds. In other words, this season's shipments east of 5,500 cars at \$1,200 a car will yield \$6,600,000, of which one-third, \$2,200,000, will accrue to railroads and refrigerator car lines, and about two-thirds, \$4,400,000, will go to growers and shippers of the fruits.

INVITATION TO CALIFORNIA

Editor AMERICAN FRUITS:

The next meeting of the Pacific Coast Association of Nurserymen has been set for December 4-7th, at Hanford, Cal., as a joint meeting with the fruit growers and horticultural commissioners of California.

At least one day will be set aside for the nurserymen and horticultural commissioners, and I wish to invite any of the eastern nurserymen who contemplate coming to California this winter to make it a point to attend this convention and get acquainted with the leading nurserymen on the Pacific coast as well as the horticultural commissioner and fruit growers of California.

F. W. POWER.

Chico, Cal., Sept. 20.

More than two hundred carloads of fruit were shipped this season by Boise, Idaho, growers. Dealers were obliged to work night and day to handle the crops. From eight to ten carloads were sent eastward daily. Idaho prunes bring high prices. C. J. Sinsel employs 88 persons in his packing house.

The United Fruit Co.—sometimes called the "banana trust"—has completed elaborate arrangements to invade the German market, this step having been prompted by the success that has attended the British branch. The Hamburg-American line is to build four fruit steamers, which will make the trip from Costa Rica to Germany in sixteen days. The government of Dutch Guiana has entered into an agreement to sell all the fruit grown in that country to the United Company. "The business of our English company, the Elders-Fyffes, Ltd., is meeting all expectations," says President A. W. Preston. "Our exportations into England this year will equal nearly 5,000,000 bunches and next year will exceed that figure."

ROSES

There's a bower of roses by
Bendeemer's stream.

And the nightingale sings
'round it all the day long;
In the time of my childhood
'twas a sweet dream
To sit in the roses and
hear the bird's song.

—Moore

Loveliest of lovely things
are they

On earth, that soonest
pass away.

The rose that lives its little
hour,

Is prized beyond the sculp-
tured flower.

—Bryant

HARDY, VIGOROUS ROSES

ALL VARIETIES

Nothing that we can say can add to the popularity of this most beautiful of flowers. Those who appreciate the beauties of nature prize roses above all things else in the ornamental line. While nearly all desire, and perhaps make an effort to have an abundance of them in their season, yet very many fail; and the failure to succeed is usually due to planting inferior bushes, thousands of which are sent out over the country every year at very low prices. Our roses cost more than the weak, puny, hot-house plants referred to, yet the results show that we give our customers as much for their money as any firm in the country. Our bushes are grown out of doors, in ordinary soil, and are as hardy and vigorous as it is possible to make them.

We are among the largest growers of Roses in the country. Our stock is large, including all varieties of recognized merit, as well as many novelties, whose merits are not yet sufficiently established to warrant our placing them in our catalogue. We are constantly on the lookout for the choicest new varieties, originating either in this country or in Europe, and spare no pains and expense in obtaining them when satisfied of their intrinsic merit.

A profusion of roses grown on your grounds will attract interest and produce orders for other stock as well.

REMEMBER THE BABY RAMBLER

(EVER BLOOMING DWARF CRIMSON RAMBLER)

We control exclusively the original stock of this grand novelty, and we offer it to our trade with the assurance that it surpasses in quality and beauty any Rose heretofore introduced. In every phase that tends to make a rose valuable—in vigor and hardiness of plant, freedom from disease and insects, profuse flowering quality, covering a greater period than any other rose, and exquisite coloring of flowers—it has no rival, while its long flowering season, from early Summer until late frosts outdoors, and daily the year round under glass, makes it doubly desirable. Two years ago we set out a number of these Roses in our nurseries. The Winter of 1903-04 was the most severe one we have had in many years. In the spring these Roses, that had no protection whatever during the Winter, were alive right out to the tips of their branches. This record shows conclusively the hardiness of this grand new Rose. We predict that it will become the most popular and highly prized Rose from Atlantic to Pacific and North and South. The Baby Rambler is sold in Europe under the name of Mme. Norbert Levavasseur and Polyantha Coccinea Purpurea, and has been catalogued by us as Crimson Beauty.

We guarantee this rose to be in bloom every day until frosts, and if grown under glass to be in bloom every day in the year.

WE WOULD SAY TOO, THAT

Our General Catalogue of Nursery Stock

SHOULD BE IN YOUR HANDS

We concede to none ability to suit your wants better than we can do with our ample facilities for growing, handling and shipping.

Soil and climate are in our favor and these with unremitting care in growing stock and an undeviating policy of FAIR, SQUARE treatment have all combined to make the CONTINENTAL NURSERIES famous.

Looks as if all Kinds of Stock Will be Cleaned Up Closely in the Spring—Demand Holds Strong—Spring Orders Coming in Every Week in Excess of Any Corresponding Week for Several Seasons.

Rochester, N. Y., Oct. 11.—Allen L. Wood, Woodlawn Nurseries: "Our sales this fall have been fully up to the average; and our spring sales at this date are far ahead of any other year. It looks as if all kinds of nursery stock will be cleaned up very closely in the spring, as there seems to be a demand for all kinds of nursery stock."

FALL SHIPMENTS ONE-HALF LARGER

Rochester, N. Y., Oct. 11.—C. H. Peck, Pinnacle Seed & Nursery Co.: "Our fall shipment is at least one-half larger than ever before, and in regard to spring shipments will say that the prospects were never so flattering as at present."

"Spring orders are coming every week in excess of any corresponding week for several years past. We shall have a larger trade for spring than we have ever had before."

One hundred and sixty carloads of peaches were shipped over the Waynesboro, Pa., Branch Railroad during the season, 135 from Mount Alto and Quincy and 35 from East Fayetteville and Ledy's. These shipments represented \$85,000.

AMERICAN FRUIT ABROAD

AMERICAN FRUIT IN EUROPE

French Journal Sounds Note of Alarm Because of Competition Caused by Exports from United States and Canada to England—Urges French Orchardists to Make Every Effort to Increase English Market Trade.

Consul John C. Covert, of Lyons, calls attention to conditions in the European fruit market, emphasizing the fact that the situation in France and England is favorable to America. He writes:

"The Journal d'Agriculture, an organ of the agricultural interests of France, recently contained an article on the increasing importance of fruit culture in France and the danger from American competition. It is set forth that it was imperatively necessary to find new markets for the increased production, unless the dealers were prepared to accept very low prices for their surplus products. I translate a part of the article:

It is especially necessary to take steps to meet the growing American competition which is developing in England. The Americans, whose enterprising genius is well known, have planted vast fruit farms and are now striving to unload their surplus in Europe, especially in England. For a number of years the market had been largely supplied from France and the importations from other countries were of secondary importance. Now that is entirely changed. Last autumn the price of pears fell suddenly over one-third from very satisfactory figures. This was due to importations from America. We hear of frequent importations of American

apples into Germany and also into France. All last winter and along into the month of April the central market stores in Paris were inundated with apples from Canada and the United States. Much of this fruit, it is true, was decidedly of a secondary character, while some of it was good, especially for cooking. If not to be compared to our choicest apples, our fruit de luxe, such as the Calvilles, Canada renettes, and other apples produced in the neighborhood of Paris, the same is not true in regard to the fruit sent from our provinces to Paris.

It seems absolutely beyond question that American competition is destined to grow and to become more active, especially in the English market, where the transportation from the United States is easy. We ought to make every effort possible to hold and to increase our trade in the English market.

"The fruit growers of France, especially the apple growers, have no apprehension of competition from the United States or Canada this year. Last year, when the apple crop of France was poor, the market here was invaded with fruit from Canada and the United States. I am told that this year the crop is exceptionally large in France and Italy."

P. C. Coann announces that the New York and Glasgow Fruit Co. is at its stand in the Corporation Fruit Market, Albion street, Glasgow. This season it will again offer the Moody Brand of Western New York pears in lots. These pears are wrapped as they come from the trees, cooled at once, shipped in special iced fruit cars and kept cool in refrigerator chambers on the ships. The company will also receive frequent consignments of choice Orleans and Niagara county apples.

ENGLISH FRUIT CROP

The report of the Board of Agriculture of Great Britain for September takes a general review of the crops for 1906. A series of local summaries is given as follows:

England, East.—Plums and stone fruit generally are reported a failure. Apples are plentiful, but they have suffered somewhat from the lack of rain. Pears are scarce.

England, North-East.—Apples are a good crop and plentiful, and pears and plums are reported plentiful in parts of Lincolnshire.

England, South-East.—Apples are fairly plentiful. Plums and damsons have slightly improved since last month, but pears are scarce.

England, Midlands.—Apples are a good crop, but are reported as small in size. Pears are scarce, while stone fruit is almost a complete failure.

England, South-West.—Apples are on the whole a fair crop, and in South Devon a large yield is recorded, but in Cornwall the crop is bad. Plums are a good crop, both in yield and quality.

England, North and North-West.—Very little fruit is grown for market in these divisions. Apples are only a moderate crop. Stone fruit almost a complete failure.

Scotland.—Very little fruit is grown. In Larnark apples, pears and plums are poor.

The Ozark Fruit Growers' Association has been storing apples for shipment to England by the train load. Sixty thousand barrels will be stored in Springfield, 15,000 at Texarkana, 1,500 barrels at Dallas and 3,000 barrels at Shreveport. Large storage capacity has also been secured at New Orleans and Gulfport, Miss.

A GOOD POLICY

To Whom It May Concern:

If there is any chance to boom business, boom it. Don't pull a long face and look as though you had a sour stomach. Hold up your head, smile and look for better things. Hide your little hammer, and try to speak well of others, no matter how small you may know yourself to be. When a stranger drops in, jolly him. Tell him this is a great city—and so it is. Don't discourage him by speaking ill of your neighbors. Lead him to believe he has at last found a place where good people live.

Don't knock.

Help yourself along by becoming popular, and push your friends with you. It's very easy. Be a good fellow and soon you'll have a procession of followers. No man ever helped himself by knocking other people down in character and business. No man ever got rich by trying to make others believe he was THE ONLY, or the only one who knew anything. You can not climb the ladder of success by treading on other's corns. Keep off the corns and don't knock.

You're not the only. There are others, and they have brains and know something as well as you. There's no end of fun minding your own business. It makes other people like you. No one admires a knocker. Don't be one. Be a man.—Credit Lost.

George F. Gallagher, who is well known in Canada, where he sold much nursery stock years ago, says that John Charlton, of whom he procured a large part of his stock, never substituted a variety and if he could not fill a bill he simply said so. There are many of this kind in the nursery business; and some orchardists complain that there are still some of the other kind.

The thirty-third annual meeting of the Horticultural Society of Southern Illinois will be held November 27-28 at Creal Springs. This society always has an interesting programme and liberal cash premiums. E. G. Mendenhall, Kilmundy, Ill., is secretary-treasurer.

The heavy rains of middle September caused one-third of the prunes growing in Clarke county, Washington, to crack and fall from the trees. The loss is estimated at \$200,000.

T. E. Dennis, of W. Dennis & Sons, commission merchants of London, has made a tour of the apple districts of the United States and Canada. He says that the present season will be a good apple year from the standpoint of the exporter. He does not believe that there will be as many apples barreled in this country as early reports indicated, and he believes that there will be a good export request at higher prices than many of the exporters may expect. Mr. Dennis does not predict that prices will be as high as last year.

THE Oakland Nurseries

Will make special prices for immediate orders on Peach and Apple trees in car lots for late fall delivery.

We also have a fine lot of shrubbery, including Berberry Thunbergii.

COMMERCIAL ORCHARDS

BIG FRUIT PROFITS

Wenatchee, Washington Orchards in Great Demand—Difficult to Secure at \$1,000 per Acre—New York and Chicago Buyers Purchase Apples of First Quality in the Orchards—Canal Company to Develop Ten Thousand Acres.

J. F. LITROOV, Washington.

I leave my position here to direct the horticultural interests of the Wenatchee Canal Co., who are planting 1,000 acres to orchards in addition to the 100 acres now bearing.

The company will put on the market 10,000 acres, in ten acre tracts; 2,000 acres will be put on the market October 1st.

Not an acre in bearing orchard can be bought less than \$1,000 and \$1,500 would be nearer right and it is difficult to purchase a place because of the surprising profits from the orchards.

Apples of the first quality are readily bought in the orchards by apple buyers from New York and Chicago to supply their fancy trade on account of high color, size and quality of the fruit.

Box Straps

Soft, Strong, Light, Easily Applied

A wire nail can be driven through without previous punching. Cheapest and best on the market.

SNEED & WOOD

Swan and Tyler, Tex.

Growers of the "Yellow Swan" and "Augbert" peach trees. The most valuable market peaches we know. Write for descriptions and prices, either to C. W. Wood, Swan, Tex., or John F. Sneed, Tyler, Tex.

The country is developing rapidly and the town of 3,500 population is changing from wooden structures to stone and brick buildings containing stores, which would do a large city proud.

Wenatchee is the outlet for a large area of country of great natural resources and will undoubtedly soon be a city of 25,000 population on account of location, natural wealth, and railroad activities to develop the surrounding country. It is located on the bend of the Columbia River south of Lake Chelan in a beautiful valley and on the Great Northern Railroad, about midway between Spokane and Seattle.

The climate is mild and season early. Churches of nearly every denomination, and the best of schools.

Everett, Wash.

The commercial apple growers are now looking towards Europe as the best market for the abundant crop of fruit in this country, says Coleman's Rural World. There is little doubt that foreign demands will have much to do with shaping the prices of fruit. There is not enough fruit produced in the eastern states to supply both home and foreign markets, and shippers are already looking towards the Mississippi valley, centered in the Ozarks, for apples to supply the demand. The crop in England will be only about 50 per cent. of an average.

A cable received by George R. Meeker & Co., New York, gave the first news of the result of the Missouri and Arkansas Ben Davis apples which were exported by this company this season. The first batch sold on October 10th, and prices obtained at Liverpool were \$4.10, netting back to New York \$3.50 and finally netting the shipper more than \$2.25 a barrel at shipping point in Arkansas and Missouri.

MAHALEB BY THE MILLION

Grown annually by us on Mahaleb Ground, which produces the very best of Stocks.

Mahaleb not Dug until Fully Matured And shipped out from our storage building in paper-lined boxes and refrigerator car service.

Two Million Now Sold to Largest and Best Cherry Growers

"The Proof of the Pudding"

A Buyer, appreciating good stock, careful packing, full count, and promptness, (a rare combination, by the way), writes us:

New York, Oct. 15, 1906.
"It is certainly a pleasure to receive from you a list of nearly one hundred different sorts of nursery stock in various amounts and find no shortage or mistakes; in fact, in this respect, we have better satisfaction from you than from any other firm with whom we do business; and as usual, your stock was received in prime condition and very satisfactory."

That was written October 15th. Our customer packed out his orders on time. No waiting for delayed shipments, shortages or mistakes. Moral: "The proof of the pudding is in the eating."

Do YOU Feel the Same Way?

Can YOU write YOUR shipper a similar letter? Then write US, and let us figure with you on your wants for spring. We grow

**ROSES, CLEMATIS.
AMPELOPSIS and TREE HYDRANGEAS**

IN LARGE QUANTITIES. Other stock in lesser quantities but in general assortment. Price lists on request to those in the Trade only.
